## Misoprostol for Postpartum Hemorrhage: Advocacy, Approval, Access

WEDNESDAY, 8 MAY 2013

0900 NEW YORK/1300 ACCRA/1500 GENEVA/1600 NAIROBI/1800 KARACHI

Misoprostol is a safe and effective medicine for preventing and treating postpartum hemorrhage, the leading cause of maternal death. While it is practical for use both at health facilities and in home births, it is not yet widely available or accessible in many countries.

In this free, interactive hour long webinar, learn from the experts how focused advocacy can drive policy change and ensure women's access to this essential medicine.
